

Custom Software • Websites • AI & Automation

About Dynamis Innovex

We build software, websites and AI-powered automations around the way your business works.

Working closely with your team, we turn specific requirements into practical digital solutions that simplify day-to-day operations and support growth.

Our Capabilities

01 Customized Software Solutions

- CRM, ERP and business management
- Workflow, orders, inventory and billing
- Customer and client management
- Internal portals, role-based applications, dashboards and reporting

Built around your workflow and connected to your existing business processes.

02 Website & Web Application Development

- Corporate, business and showcase websites
- Web portals and customer applications
- Responsive UI/UX across devices
- Premium animations, scroll effects and micro-interactions

Performance-focused development, deployment and technical support.

03 AI & Business Automation

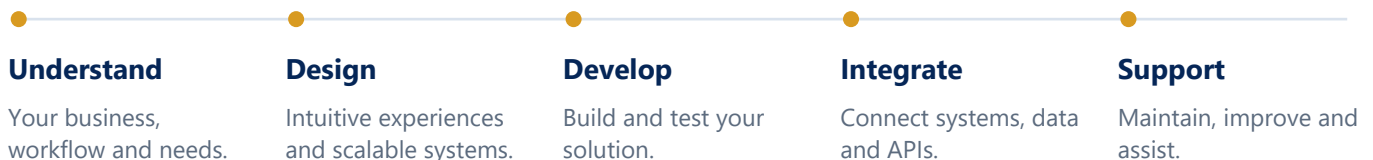

- AI chatbots, assistants and customer support
- Workflow and repetitive task automation
- Data, document and information processing
- Intelligent tools, APIs and integrations

Less repetitive work. More time for your business.

04 Data, Analytics & Digital Solutions

- Dashboards and data visualization
- Reporting and custom analytics platforms
- Database-driven applications
- Operational insights and digital transformation
